MEMORANDUM FOR: Chairman, Deployment Working Group, GMAIC

SUBJECT : Search of USSR for New ICBM Deployment

REFERENCE : Requirement GMAIC 22-64
(NPIC Project N 931-64)

1. This memorandum is in response to your Requirement requesting a search of that portion of the Soviet Union lying between 48 and 56 degrees north latitude for new ICBM deployment.

2. All passes of KH-4 missions from [] to the present were systematically searched within the above described belt in the Soviet Union for new ICBM Deployment. In addition to these missions, those passes from Missions [] and [] which provided additional coverage were also searched. This scan produced the identification of two new ICBM single silo complexes, one at Aleysk on Mission [] and the other at Imeni Gaspello on Mission []. In addition 103 areas of unidentified activity were observed. All of these areas appear to be under construction and at this time bear no evidence of missile association, however, they will be re-examined as coverage becomes available.

3. As future missions are received, the eight degree search belt will continue to be scanned on a high priority basis and any significant items will be brought to your attention.
